1 - Log in	We want to test our login to make sure when we enter a username and password that doesn't match our database it will not let the user in. And that if it is in our database it'll let him in.	<p>Pass: User can enter their credentials to successfully login to their account, user cannot enter the site if their credentials do not match any of those located in the database</p> <p>Fail: User is unable to log in using their own credentials, user can log in using blank or invalid credentials</p>	<ol style="list-style-type: none"> 1) Log in as a player 2) Log in as a coach 3) Try to log in without entering anything 	<p>[Ben 12/11/19]: successfully logged in as player, coach, and not able to log in without entering anything</p> <p>[Gio 12/11/19]: successfully logged in as player, coach, and not able to log in without entering anything</p> <p>[Sheldon 12/11/19]: successfully logged in as player, coach, and not able to log in without entering anything.</p> <p>[Austin] 12/12/19]: successfully logged in as player, coach, and not able to log in without entering anything.</p> <p>[RJ 12/12/19]:</p>

2 - Create a team	We are testing that only coaches can create a team and that it's easy to do so.	Pass: User logs into account, goes to team page, should not be able to create a team	1) When a coach signs up, he creates a team	[Ben 12/11/19]: when logged in as player, unable to create a team,

		Fail: If the user is logged in as a player and able to create a team	2) What if he doesn't want to create a team, can he still sign up?	<p>when logged in as coach able to create a team</p> <p>[Gio 12/11/19]: when logged in as player, unable to create a team</p> <p>[Sheldon 12/11/19]: when logged in as player, unable to create a team</p> <p>[Austin 12/11/19]: when logged in as player, unable to create a team</p> <p>[Maks 12/12/19]: when logged in as player, unable to create a team</p>

3 - Navigate to the team page	We want to test the navigation of our app. When one signs up and then logs in they have the choice to go to the find a match page or the team page. We want to test how easy it is to navigate from one point to another.	<p>Pass: User should be able to successfully sign up, be taken to the team page, and use the nav bar to go to the "find a match" page or the "team page".</p> <p>Fail: User cannot login/sign up, user is not taken to player page upon login/sign up, user is not able to navigate to "find a match" page or "team page"</p>	<ol style="list-style-type: none"> 1) How would you go to that page as a player 2) How would you go to that page as a coach 3) How would you go to the team page from the signup page. 	<p>[Ben 12/11/19]: logged in as a player, used nav bar to navigate to match/team page</p> <p>[Gio 12/11/19]: logged in as a player, used nav bar to navigate to match/team page</p> <p>[Gio 12/11/19]: logged in as a player, used nav bar to navigate to match/team page</p> <p>[Sheldon 12/12/19]: logged in as coach, navigated to signup page from team page using nav bar</p> <p>[Austin 12/12/19]: logged in as</p>
